# PAVERDECK™

## Your Best Deck Investment

**PAVERDECK™**

The PAVERDECK system is an easy to install decking option that affords unlimited design options and endless applications, as well as a lifetime maintenance free outdoor living space.

# *PATIO DECKS*

Installed on deck pads or with frost footings. Unlike a traditional patio, a PAVERDECK patio resists heaving and movement of pavers. There are many designs using a variety of landscaping stone and concrete products, including: interlocking pavers, slabs, caps, steps, edges and more. Create your own outdoor oasis with beautiful landscaping, patio designs and products, and add a touch of elegance and value to your home and backyard.

# STANDARD DECKS

A PAVERDECK deck can be installed on a ledger attached to your home, or can be free floating. There is an endless assortment of beautiful concrete and natural stone slabs suitable for any PAVERDECK outdoor space, including pavers that look like wood decking and other natural materials. Stone makes a lasting impression and adds value to your home.

There is sure to be a design and style that matches your vision!

 **PAVERDECK™**

# *ELEVATED DECKS*

PAVERDECK provides a fantastic option for an elevated deck. Unlike a traditional deck, the PAVERDECK structure can span 12 ft from the house to the first beam, providing an unobstructed space beneath. Add this to the 39" cantilever capability, and you can have a 14 ft elevated deck with only one supporting beam. PAVERDECK allows for new options, including in-floor heating for snow-melt or heated sunroom additions. PAVERDECK can also support hot tubs and built-in stone kitchens.

# *GALVANIZED STEEL DECK KITS*

PAVERDECK can be cut and shaped into any configuration and can accommodate any finish in any pattern with traditional or new materials. Create a look to suit your preference for design or budget.

Choices can range from natural wood or stone, concrete pavers, capped plastic decking, porcelain or stone tile, poured or stamped concrete. The surface materials can be mixed and matched to create unique customized patterns.

## ***A Lifetime Deck System***

---

The PAVERDECK galvanized steel deck system is the only deck system with an unmatched 30-year structural warranty. The steel deck may last indefinitely with our replaceable anode system, and concrete or stone paver finishes can exceed 100 years.

# ENGINEERED FOR STRENGTH

PAVERDECK is rated for commercial loading and can be used for ramps, roof terraces, open patios and permeable storm water decks.

The PAVERDECK system is suitable for use as an exterior or interior platform for residential and commercial buildings in compliance with Building Codes of Canada and the United States. The PAVERDECK system is supplied with technical specifications bearing a professional engineering seal for Ontario and other provinces.
